

2013 Ford Flex

Fans of the Ford Flex have even more to love next year with an upgraded model with a sleek new look and even more technology to make driving safer, easier and more fuel-efficient.

SYNC with the latest generation of MyFord Touch:

The revamped MyFord Touch® provides two 4.2-inch screens in the instrument cluster and an eight-inch screen in the center stack to make it easier to manage information, control features and adjust settings

New interior driver zone:

Includes new instrument clusters, steering wheel, seat trim and foam, and electronic finish panels

Redesigned front end:

Flex's updated front rounds out the previously boxy edges to create harmony with the rest of the vehicle, including new fascia, headlamps and FLEX badging across the hood

Passive entry/start: Allows for unlocking and engine starting remotely

New thumb shifter: The SelectShift™ advanced gearbox offers the driver a choice between fully automatic operation and manual control

Rain-sensing wipers and power-fold mirrors: Available enhancements to improve safety and driver comfort

New wheel styles: Multiple wheel options including 20-inch machined aluminum wheels with painted pockets available with the Appearance Package

Dual chrome exhaust tips: Now standard on Flex
